# Clean Energy National Online Survey <br> Key findings from a national online survey of 1,000 actual voters, conducted December 16-22, 2020. 

Methodology
Public Opinion Strategies is pleased to present the key findings from an online survey of 1,000 actual voters nationwide, conducted December 16-22, 2020, with a credibility interval of $\pm 3.53 \%$.

Glen Bolger was the principal researcher. Gabe Imber was the project director, and Torie Bolger provided analytical support.

PUBLIC OPINION
STRATEGIES
turning questions into answers

## Political

## Environment

## Voters continue to be extremely pessimistic about the direction of the country.

"Would you say that things in the country are going in the right direction, or have they pretty seriously gotten off on the wrong track?"

| RCP National Average |  |
| :--- | ---: |
| Right Direction | $29 \%$ |
| Wrong Track | $64 \%$ |

## After Trump's loss, a majority of Republicans are now negative. Inds and Dems remain pessimistic.

National Mood Trend by Party

## Half the voters voted for the Democratic candidate from their Congressional district.

"Thinking about the recent elections... For whom did you vote in the election for U.S. Congress in your district... the Republican candidate ...or... the Democratic candidate?"

$\begin{array}{llllll}11 / 16 & 2 / 18 & 11 / 18 & 11 / 19 & 10 / 20 & 12 / 20\end{array}$
$\longrightarrow$ Republican Candidate $\longrightarrow$ Democratic Candidate

# There is a slight generation gap. Older voters were more likely to vote Republican than Democrat. 

## President Trump's approval rating continues to be underwater.

"Do you approve or disapprove of the job Donald Trump is doing as President?"

$\begin{array}{lll}11 / 19 & 10 / 20 & 12 / 20\end{array}$
—Approve $\quad$ Disapprove $\quad$ Strongly Approve $\quad$ Strongly Disapprove

# Not surprisingly, GOPers approve of the President. Independents and Democrats remain negative. 

## Trump Approval Trend by Party

# Presidential Ballot Test 

## This mirrors the final result. Trump lost Independents by double digits.

 "And, for whom did you vote in the November Presidential election... Donald Trump and Mike Pence, Republicans, Joe Biden and Kamala Harris, Democrats, ...or... a third party candidate?"| Overall |  |
| :--- | :--- |
| $\underline{2020}$ Pres Elec |  |
| Total Trump | $46.9 \%$ |
| Total Biden | $51.4 \%$ |

Third Party

## Clean Energy

 Policy Proposals
## Policies emphasizing renewable projects and energy efficiency upgrades are the most favorable to voters.

"Please read the following list of policies that supporters have proposed to help expand your state's commitment to clean energy. After you read each one, please indicate whether you favor or oppose that policy."

## Ranked by \% Strongly Favor

Community renewable projects like solar that enable consumers to share the benefits and save money on their
bills.

Allow more electric utility competition which would give people the choice of what companies they buy their power from.

More funding for research and development of clean energy solutions.
$\square$ 84\%

Increasing research and development to accelerate the adoption of battery storage technologies that allow for greater use of renewable energy even when the sun is
 not shining or the wind is not blowing.

|  |  |
| ---: | :--- | :--- | :--- |
|  | Strongly Favor $\quad \square$ Total Favor $\quad \square$ Strongly Oppose $\quad \square$ Total Oppose |

## Cutting regulations, giving tax credits for clean energy, and increasing spending for the electricity grid are also popular policies.

"Please read the following list of policies that supporters have proposed to help expand your state's commitment to clean energy. After you read each one, please indicate whether you favor or oppose that policy."

Increase government spending to modernize America's electricity
grid.

As you may know, Carbon Capture and Storage is a technology that can trap and prevent carbon dioxide emissions, also known as
"C O Two", produced in electricity generation and industrial
processes and stop the byproduct from entering the earth's atmosphere. Adding Carbon Capture and Storage to power plants

may increase the cost of electricity but would help protect the
environment.

| 日Strongly Favor | $\square$ Total Favor | $\square$ Strongly Oppose $\quad \square$ Total Oppose |

## Message <br> Testing

## Voters are divided on whether owners of electric vehicles should be subjected to special taxes or not.

"Thinking about infrastructure needs for electric vehicles, like charging stations and the roads and highways they travel on, electric vehicle charging stations are often paid for by state governments, which fund these stations with resources collected from the gas tax.

Thinking about infrastructure needs for electric vehicles, like charging stations and the roads and highways they travel on, electric vehicle charging stations are often paid for by state governments, which fund these stations with resources collected from the gas tax."

Some people say that many owners of electric vehicles are wealthy and they should not be exempt from paying gas taxes that subsidize the cost of charging stations for their cars or without having to pay into the maintenance for the roads and highways they also use. There should be a tax for electric vehicles so owners of these are paying their fair share to fund our roads, highways, and the charging stations for their automobiles.
...while...

## 50\%

Other people say that owners of electric vehicles pay more for those automobiles because they are more costly to begin with, and they are also helping the environment by not using fossil fuels that create emissions, and therefore owners of electric vehicles should not be subject to special taxes but encouraged to drive them. People who buy electric vehicles are helping lead the nation's transition from gas-powered cars and are taking on risks by spending on this new technology. They should be credited, not punished.

## While a majority of voters say net metering is fair.

#### Abstract

"Changing topics slightly... As you may know, thirty-four states have a policy called net metering that allows homeowners, businesses, local school districts, and other organizations to get full retail credit for the extra energy their rooftop solar panels produce. This extra solar energy goes onto the electricity grid for the utility company to sell at the full retail rate to other customers. Please read the following two statements about this, and please indicate which one comes closer to your own point of view."

Some people say net metering is fair because it encourages the development of solar resources, and other customers benefit from the extra solar energy that goes onto the electricity grid.
...while...

45\%
Other people say net metering is unfair because solar customers use the electricity grid, too, and need to pay a fair rate for their use. They say that otherwise, solar customers' use of the electricity grid becomes subsidized by non-solar customers.

## Nearly three-quarters of voters support renewable wind and solar projects in rural areas.

"Renewable energy development is becoming increasingly common in rural landscapes across the country. Most of them are utility scale projects of wind and solar. Now, please read the following two statements and after you read each one, please indicate which statement comes closest to your own opinion..."

Supporters of renewable wind and solar projects in rural areas say those projects are good because they boost the income of farmers, helping them to survive financially and maintain their family farm.
...while...

Opponents of renewable wind and solar projects in rural areas say those projects are bad because they ruin beautiful views, kill birds, and take some good farmland out of production.

## There is high support for creating a new electricity system to give consumers a choice and benefit the environment.

"Now, please read two additional options about purchasing electricity, and please indicate which one you prefer."^

A new system that allows people to have a choice of where they purchase electricity and what kind of electricity, such as clean energy.
...or...

## 74\%

ow, please read two additional options about purchasing electricity, and please indicate which one you prefer."^^

## These statements test well, especially ones focused on leveling the playing field for clean energy companies.

Thinking again about clean energy... Please read the following statements about why some people want to accelerate the growth of clean energy, by speeding up the development of sources of renewable energy like wind and solar power. After you read each statement, please indicate whether you agree or disagree with that statement."<br>\section*{Ranked by \% Strongly Agree}

Clean energy companies should be allowed access to the same financing options that help traditional energy companies attract investment in new technologies. This would include giving investors a tax benefit for using private funds instead of taxpayer funds to support new clean energy 86\% innovations.

We should accelerate the growth of clean energy so that we can more quickly make the inevitable transition away from carbon-emitting sources of energy like coal.

We should accelerate the growth of clean energy so that we can decentralize our nation's electricity sources, protecting them from prolonged outages due to extreme weather or security threats.

We should accelerate the growth of clean energy so that our state can be a national leader in the competition for economic development and good-paying jobs.

We should increase state government funding for basic research into clean energy technology without picking winners and losers, launching a
"space race"-style effort to reach new energy frontiers.

| ■Strongly Agree $\quad \square$ Total Agree | $\square$ Strongly Disagree $\quad \square$ Total Disagree |
| :--- | :--- | :--- |

## Overall support for government intervention on the use of clean energy dipped slightly, but eight-in-ten voters still support it.

"And now that you have heard some more information, do you support or oppose the government taking action to accelerate the development and use of clean energy in the United States?"
