

DATA FOR PROGRESS

From October 11 to 13, 2024, Data for Progress conducted a survey of 1,206 U.S. likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and 2020 recalled vote. The survey was conducted in English. The margin of error associated with the sample size is ± 3 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,206 unless otherwise specified.

[1] Who do you trust more to handle climate and extreme weather disasters like the recent hurricanes Helene and Milton affecting the southeastern U.S.?

[5] Would you support or oppose Congress passing a "climate superfund" bill, which would require the biggest polluters to pay a share to confront the climate crisis?

The fund would be used to finance a wide range of efforts to tackle the impacts of climate change, including providing additional funding for FEMA.
