

From January 28 to 30, 2025, Data for Progress and the Center for Climate Integrity conducted a survey of 656 likely voters in California, including an oversample of Los Angeles County, using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, geography, and recalled presidential vote, accounting for the Los Angeles County oversample. The survey was conducted in English. The margin of error associated with the sample size is ± 4 percentage points. Results for subgroups of the sample are subject to increased margins of error. Partisanship reflected in tabulations is based on self-identified party affiliation, not partisan registration. For more information please visit dataforprogress.org/our-methodology.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=656 unless otherwise specified.

[1] How much, if at all, have you seen or heard about the California Fair Access to Insurance Requirements (FAIR) Plan?

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	Under 45	45+	No College	College	Asian	White	Latino	Los Angeles County

[5] Some lawmakers in your state are proposing legislation that would enable individuals and insurance companies harmed by climate disasters and extreme weather events to recover their losses from oil and gas companies. They point to evidence that oil and gas companies have lied to the public about the role their products play in fueling climate change as a reason why these companies should pay.

Do you support or oppose this proposal becoming law in your state?
